

Natural Resources, Forests and Wildlife

Class 4 • EVS • Worksheet (illustrative sample)

Worksheet for Class 4 EVS: Natural Resources, Forests and Wildlife.

Questions

1. What are renewable natural resources? Give two examples.
2. Why is petroleum called a non-renewable resource?
3. Why are forests referred to as the "lungs of the Earth"?
4. What does the term "endangered species" mean?
5. Name the famous national park in Gujarat dedicated to protecting Asiatic Lions.
6. Which state is Kaziranga National Park located in, and which animal is it famous for?
7. What is deforestation, and what harm does it cause?
8. Explain how trees prevent soil erosion during heavy rains.

Answer Key

1. Resources that nature replenishes continuously; examples: solar energy, wind, water.
2. It takes millions of years to form under the earth and cannot be replaced once depleted.
3. Because trees absorb carbon dioxide and release abundant oxygen essential for breathing.
4. Species of animals or plants at serious risk of disappearing and becoming extinct.
5. Gir National Park.
6. Assam; famous for the Great Indian One-horned Rhinoceros.
7. The large-scale cutting down of forests; causes floods, soil erosion, climate change, and habitat loss.
8. Dense tree roots bind and grip topsoil tightly, preventing rushing rainwater from washing it away.
